

### Current Situation in the Red Sea:

The situation in the Red Sea and the Gulf of Aden remains highly volatile, and all available sources confirm that the security risk remains at a significantly high level. For this reason, most shipping companies will maintain the route around the Cape of Good Hope until further notice.

### Current Situation of Container Services at the Port of Barcelona:

The schedules of container services at the Port of Barcelona, which are susceptible to transit through the Suez Canal, are updated below. We focus on the import/export services of these routes due to the potential impact on the traffic volume with the Port of Barcelona. As of today, most of services have altered their routes to avoid possible attacks on merchant ships in the Red Sea and have redirected towards the Cape of Good Hope.

Currently, the vessels departing from origin already plan to navigate through the Cape of Good Hope, so the Estimated Time of Arrival (ETA) announced by the shipping companies already incorporates the delays from the route diversion, with delays ranging from 10-20 days

The forecasts provided below come from various sources (shipping company websites, information provided by shipowners/agencies at the Port of Barcelona, AIS systems, consulting firms, and specialized press) and are subject to changes. The usual rotation indicated for the services may also be affected as it depends on many variables.

#### Areas and container services likely to transit through the Suez Canal:

##### South and East Africa / Indian Ocean

Service MINA / MEDEX / IMX / WM3

Service MD1

##### Australia and New Zealand / Pacific Islands

Service MD1

##### Far East and Japan

Service DRAGON SERVICE

Service FIM - FAR EAST INDIA MEDITERRANEAN

Service JADE / AE-11 / SERA 2 (JS)

Service MD1 (JS)

Service MD2 (JS)

Service MED2 / MEX 1 / WM2 / MX1 / AEM2 (JS)

Service PANDA EXPRESS

##### Persian Gulf / Arabian Sea

Service MINA / MEDEX / IMX / WM3 (JS)

##### The Red Sea

Service FIM - FAR EAST INDIA MEDITERRANEAN

Service MINA / MEDEX / IMX / WM3 (JS)

Service MD1 (JS)

**Mediterranean East / Black Sea / Caspian / Middle East**

Service FIM - FAR EAST INDIA MEDITERRANEAN  
 Service MINA / MEDEX / IMX / WM3 (JS)  
 Service MD2 (JS)  
 Service MED2 / MEX 1 / WM2 / MX1 / AEM2 (JS)  
 Service PANDA EXPRESS

**Pakistan / India / Sri Lanka / Bangladesh**

Service FIM - FAR EAST INDIA MEDITERRANEAN  
 Service MINA / MEDEX / IMX / WM3 (JS)  
 Service MD1 (JS)  
 Service MED2 / MEX 1 / WM2 / MX1 / AEM2 (JS)  
 Service PANDA EXPRESS

**Southeast Asia**

Service DRAGON SERVICE  
 Service FIM - FAR EAST INDIA MEDITERRANEAN  
 Service JADE / AE-11 / SERA 2 (JS)  
 Service MD1 (JS)  
 Service MD2 (JS)  
 Service MED2 / MEX 1 / WM2 / MX1 / AEM2 (JS)

**Update on container services at the Port of Barcelona with possible impact due to the situation in the Red Sea:**

<b>Service</b>	MINA / MEDEX / IMX / WM3 (JS)	
<b>Ship owner</b>	HAPAG-LLOYD / CMA CGM / COSCO CONTAINER LINES / OOCL	
<b>Terminal</b>	APM TERMINALS BARCELONA SLU HAMAD/QATAR, JEBEL ALI/EMIRATOS ARABES UNIDOS, MUHAMMAD BIN

### Impact on Freight Rates:

- According to the consultancy Drewry, the composite index has decreased compared to the data from the previous week, reaching \$3,855 per 40' container, which is 2% higher than the same week last year.  
This index is 171% higher than the average rates in 2019 (pre-pandemic), which were set at \$1,420 per 40' container.
- Transport rates from N. Europe to Asia have decreased to \$518 per 40' container. The rates from Asia to N. Europe have decreased as well by 3%, down to \$4,231 per 40' container.
- Similarly, rates from Asia to the Mediterranean have decreased, settling at \$5,086 per 40' container.

### Environmental Impact

This disruption entails a series of effects on the logistics chain in terms of schedules, economic costs, and environmental impact. Indeed, a recent study by the Sea-Intelligence consultancy has predicted that CO2 emissions from maritime companies would increase as a consequence of the current crisis in the Red Sea. According to this consultancy, there are three factors to consider:

- Longer navigation lengths result in increased emissions.
- Higher navigation speeds (to maintain weekly departures).
- Switching from larger vessels to smaller and less fuel-efficient vessels.

Considering these three components could lead to a 354% increase in CO2 emissions in the Mediterranean, as indicated in the following graph.

Route	Route code	02-Jan-25	09-Jan-25	16-Jan-25	Weekly change (%)	Annual change (%)
Composite Index	WCI-COMPOSITE	\$3,905	\$3,986	\$3,855	-3% ▼	2% ▲

**Car-Carriers Situation at the Port of Barcelona:**

In terms of Car Carrier vessels, shipping companies are making different decisions regarding the passage of ships through the Red Sea. In general, shipping companies have diverted vessels around the Cape of Good Hope, assuming an increase in transit time of between 10 and 14 days. This is the case for K-line, NYK, MOL, Wallenius Wilhelmsen, Eukor, and Hoegh Autoliners.

The cost of chartering a vessel is also increasing because of the conflict, reaching \$115,000 per day (compared to \$22,000 per day in 2021), according to information from Lloyd's List.

The situation in the Red Sea continues to disrupt trade between Europe and the Far East for Car-carrier/RoRo vessels. Assuming a conservative scenario of an additional 10 days of transit via the Cape of Good Hope, it is estimated that an extra capacity of 3-4% is needed. This volume represents almost half of the capacity expected to enter the market this year to meet current demand.
